

AUTOMATIC SLIDING DOORS

The Heritage contains an automatic sliding cab door that travels with the elevator. A swing door at each landing conceals the elevator shaft. When the elevator arrives at each floor the sliding cab door opens, unlocking the landing door. Only when both the landing door and sliding cab door have closed will the elevator move again.

RESIDENTIAL ELEVATOR

- DPI in the elevator
- Custom fixtures to coordinate with interior decoration
- Cab finish has endless design options
- Emergency 24V DC battery feature provides lowering, lighting and door opening in the event of a power outage

OPTIONS

- Custom cab sizes
- 96" cab height (108" overhead required)
- Custom cab finishes
- Custom fixture finishes
- Custom entrance heights and finishes

IT'S ABOUT CONVENIENCE

The Heritage model is the best of both worlds; convenience of an automatic cab door coupled with a swing door on the landing, retaining a traditional look. The elevator can be hidden behind regular or custom doors to match the decor throughout the home. Preserve your privacy by disguising your Heritage into the natural structure of your home. Guests will never even know it's there.
